Professional Summary:

- 2.5 years of experience as a **Software Developer**, with a strong focus on **web application development** using modern frontend technologies.
- Proven expertise in **Angular (2+ to latest versions)** with hands-on experience in building **scalable, maintainable, and high-performance web applications**.
- Designed and developed **responsive and user-friendly UI components** using Angular, ensuring seamless user experiences across devices and browsers.
- Extensive knowledge of Angular concepts including **Modules, Components, Services, Dependency Injection, Routing, Guards, and Lifecycle Hooks**.
- Proficient in using **Angular Material, Bootstrap**, and **custom CSS** for crafting visually appealing and consistent UI/UX.
- Experienced in integrating **RESTful APIs** to enable efficient data exchange between the frontend and backend.
- Hands-on experience with **RxJS Observables, Reactive Forms**, and **Angular Pipes & Directives** to enhance application interactivity and performance.
- Familiar with **version control systems** like Git and GitHub for efficient source code management and collaboration.
- Strong debugging and troubleshooting skills, experienced in using **Chrome DevTools, console logging**, and error-handling best practices.
- Quick learner with a passion for emerging technologies, regularly exploring new Angular updates, libraries, and performance optimization techniques.
- Excellent communication and teamwork skills, with a track record of collaborating closely with cross-functional teams, UI/UX designers, and backend developers.

Languages	:	JavaScript, Typescript, Core Java
Web Development	:	HTML, CSS, Bootstrap, RESTful APIs
Frameworks	:	Angular
Development Tools	:	VS Code, Postman, IntelliJ
Databases	:	MySQL
Build Tools	:	npm
Code Management	:	GITHUB

Experience Details:

- Working as Software Developer at Axitemus from August 2023 – till present.

Professional Experience:

Project :

Project	: Enterprise resource planning (ERP)
Role	: Software Developer (Angular)
Environment	: Angular, TypeScript, , HTML, CSS

Description:

Enterprise Resource Planning (ERP) integrates core business processes, streamlining operations across departments. It unifies modules for inventory, purchases, sales, and production, ensuring efficient resource management. The system also includes CRM for customer relations, HRD for human resource management, quality control (QC) for maintaining standards, and comprehensive admin and accounts functionalities. This holistic approach enhances productivity and decision-making.

Responsibilities:

- ✓ Developed interactive dashboards for **sales**, **CRM**, and **accounts** modules using Angular.
- ✓ Developed RESTful APIs and services using Angular for ERP functionalities..
- ✓ Integrated **automated workflows** for seamless operations between departments.
- ✓ Conducted **unit testing** to maintain code quality and reliability.

Professional Achievements:

- 4 Star in Problem Solving using Core Java at Hacker Rank.
- Chess Runner-up in distric level.
